Subject: Comments Re: the Planning Grant Workshop - 12/15/10
Importance: High

Please consider the following as comments made as part of the 12/15/10 planning grant workshop.

1. Many entities have expressed an interest in applying for planning grants in the second round. **Shifting funds from the second round to the first round to accommodate an over allocation of funds by DWR is entirely inappropriate.** This would reduce the already limited amount of funds available in the second round and unfairly penalize those entities that chose to wait until the second round.
2. **It is inappropriate to shift the remaining DAC funding burden to the second round.** This places a disproportionate burden on applicants in the second round to meet the legislative mandate.

Thank you,
Lauren
